INTRODUCTION

WTC2005-63030
Novel Superabsorbent Polymer-Based Lubricant Technology
Richard Levy, Michael A. Nichols, and William R. Opp

WTC2005-63049
Synthetic Lubricants Based on Sebacic Complex Esters
Liviu E. Mirci, Sorina Boran, Paula Luca, and Victor Boiangu

WTC2005-63076
Three-Dimensional Thermal Field in Slider Bearings
Miles Zengeya, Mohamed Gadala, and Gius Segal

WTC2005-63078
Effective Tribology Testing of Lubricating Oils
Norm Gitis

WTC2005-63099
Plastic Deformations of Micro-Spheres by Solidified Lubricants and Lubricants' Shear Stress Under Very High Pressure
Yuichi Nakamura, Masanori Shimaoka, Yutaka Ishibashi, and Masahito Matsui

WTC2005-63100
High-Pressure Viscometry and Dilatometry for Lubricant Oils in a Diamond Anvil Cell Up to 6 GPa
Yuichi Nakamura, Kazuyuki Sanda, and Hideki Matsubo

WTC2005-63116
Variable Timestepping in EHD Problems
Vasilios Bakolas and Wolfgang Borchers

WTC2005-63118
Influence of Lubricant and Operating Parameters on EHD Lubrication in Hypoid Gears
Vilmos V. Simon

WTC2005-63123
The New Lubrication Technology and China's Sustained Development
Xingguo Fu, Xiaohong Xu, and Xuguang Zhou

WTC2005-63164
Wear Behaviour of Binary Oil Mixtures Under Extreme-Pressure Conditions
J. E. Fernandez Rico, A. Hernandez Battez, and R. Chou Rodriguez

WTC2005-63168
Application of Acoustic Emission for High-Pressure Short Time Solidification of Traction Fluids
Nobuyoshi Ohno and Wataru Tokunaga

WTC2005-63174
Static and Kinetic Friction of Smooth Glass Surfaces Rubbed With Silicone Oils
L. Rapoport, V. Shmukler, A. Moshkovitch, and A. Verdyan

WTC2005-63183
Experimental Study of Real Roughness Features Within EHD Point Contacts
Ivan Krupka, Martin Hartl, and Miroslav Liska

WTC2005-63192
Numerical Analysis on the Effect of Transverse Surface Roughness in Non-Newtonian Fluid Lubrication
Haosheng Chen, Yongqian Li, Darong Chen, and Jiadao Wang
WTC2005-63193
Flash Temperature Parameter Number Prediction Model by Design of Tribological Experiments for Basestock Mineral Oil Containing Palm Olein and Aminophosphate Additives
H. H. Masjuki, M. G. Saifullah, M. Husnawan, M. S. Faizul, and M. G. Shaaban

WTC2005-63212
Prediction of Wear Rate Dispersion in Mixed Lubrication
F. Robbe-Valloire, R. Progri, B. Paffoni, and R. Gras

WTC2005-63226
EHD Contacts in Low-Amplitude Oscillatory Motion
Romeo P. Glovnea and Hugh A. Spikes

WTC2005-63234
Influence of Surface Modification on Aqueous Lubrication of Elastomers
S. Lee and N. D. Spencer

WTC2005-6326
Some Tribological Properties of an Ionic Liquid
Takashi Nogi

WTC2005-63329
High Pressure Lubricant Property Measurements
Bo O. Jacobson

WTC2005-63332
Surfactant Influence on the Tribological Properties of Bentonite-Based Greases
A. K. Pogosian and T. R. Martirosyan

WTC2005-63333
A Constant Temperature FZG Test for Open Gear Lubricants
P. L. de Vaal and B. Meister

WTC2005-63345
Reynolds Equations for Common Generalized Newtonian Models and an Approximate Reynolds-Carreau Equation
Scott Bair and M. M. Khonsari

WTC2005-63390
Thermal and Non-Newtonian Numerical Analyses for Starved EHL Line Contacts
P. Yang, J. Wang, and M. Kaneta

WTC2005-63411
Tribological Performances of Some Piston Ring Materials Lubricated With Low Acidity Fuel Alcohol
Liu Xiao, Shenghua Li, Wancheng Zhao, Yuansheng Jin, Yucong Wang, and Simon C. Tung

WTC2005-63434
Investigation of Some Liquid Lubricants for Potential Aerospace Application
Weimin Liu, Lijun Weng, Dapeng Feng, and Haizhong Wang

WTC2005-63438
Roughness Amplitude Reduction Under Non-Newtonian EHL Conditions
A. D. Chapkov, C. H. Venner, and A. A. Lubrecht

WTC2005-63445
Scuffing Initiation, Scuffing Propagation and Pitting of a Four-Ball Tribosystem Lubricated With Mineral and Synthetic Oils
Waldemar Tuszyński, Witold Piekoszewski, and Marian Szczerek

WTC2005-63479
Thermohydrodynamic Behavior of a Slider Pocket Bearing
Mihai B. Dobrica and Michel Fillon
WTC2005-63484
Sunflower Based Grease for Heavy Duty Applications
   J. Barriga, A. Aranzabe, and A. Igartua

WTC2005-63503
Environmentally Acceptable Lubricants: Current Status and Future Opportunities
   Nigel S. Battersby

WTC2005-63515
High Oleic Plant Oils With Hydroxy Fatty Acids for Emission Reduction
   J. Grushcow

WTC2005-63523
Next Generation Feedstocks From New Frontiers in Oilseed Engineering
   J. Grushcow and M. A. Smith

WTC2005-63556
Elasto-Hydrodynamic Lubrication Modeling of Spherical Metal-on-Metal Artificial Hip Joints
   F. C. Wang, Z. M. Jin, and I. J. Udofia

WTC2005-63563
Effect of Detailed Base Oil Structure on Oxidation Performance of Automatic Transmission Fluids
   Mark T. Devlin, Randall E. Baren, Samuel H. Tersigni, and Tze-Chi Jao

WTC2005-63580
Disk-Like Compounds Showing Low Traction Coefficient Under EHL Contacts
   Ken Kawata

WTC2005-63584
Thermal EHL Analyses of Point Contacts With Surface Roughness
   J. Wang, P. Yang, and M. Kaneta

WTC2005-63641
The Pressure and Film Thickness Distributions in Point Elastohydrodynamic Contact Under Dynamic Load
   M. Ya. Panovko

WTC2005-63660
A New Implementation of Reynolds Equation for Analyzing Mixed EHL
   K. Ichimaru

WTC2005-63686
A Simple Investigation Method of Rheological Properties of Molecular Substances
   Emanuel Diaconescu, Oana Miron Onciul, and Mircea Balan

WTC2005-63687
Lubricity Synergism in Boundary Lubrication
   Ion M. Sivebaek, Nadja L. Hansen, and Kenneth H. Johansen

WTC2005-63705
Analysis of EHL Circular Contact Start Up: Comparison With Experimental Results
   Jiaxin Zhao

WTC2005-63720
Some Analytical Approximations and Numerical Solutions of EHL Problems for Non-Newtonian Fluids Fatigue
   Ilya I. Kudish

WTC2005-63744
Novel Ionic Liquid Lubricants for Aerospace and MEMS
   Barbara J. Kinzig, Paul Sutor, Gregory W. Sawyer, Alison Rennie, and Pamela Dickrell
Two-Phase Hydrodynamic Modeling of Particulate Fluids in Sliding Contacts

Elon Terrell, Jonathon Garcia, and C. Fred Higgs III

Coconut Oil as Bio Lubricant: Study of the Anti-Wear Properties Using Quantum Chemical Calculations and Tribological Tests

N. H. Jayadas and K. Prabhakaran Nair

Ultrasonic Phase and Amplitude and the Measurement of Oil Film Thickness

R. S. Dwyer-Joyce, T. Reddyhoff, and B. Drinkwater

New Estimations of Surface Properties for Tribological Studies by Neutron Reflectometry

Tomoko Hirayama, Hiroki Takemoto, Kazuko Inoue, Toru Ebisawa, Seiji Tasaki, Masahiro Hino, Naoya Torikai, Hirohiko Shimizu, and Kazuaki Ikeda

Elastohydrodynamic Lubrication of Multiple Periodic Ridges

A. V. Olver, R. Glovnea, J.-W. Choo, and H. A. Spikes

Electrostatic Generation in Dielectric Fluids: The Viscoelectric Effect

Robert T. Balmer

Lubrication With Water-Based Clay Suspensions

B. B. Briscoe, P. M. Cann, A. Delfino, and G. Maitland

CFD Modelling of Elastohydrodynamic Lubrication

Markus Hartinger, David Gosman, Stathis Ioannides, and Hugh A. Spikes

Frictional Behavior and Tribo-Carbonization of a Synthetic Engine Oil (SJ/CF/5W-30) With Different Tribo-Materials Under Stepwise Heating Conditions

Ruijun Zhang, Shenghua Li, and Yuangsheng Jin

THD Analysis of Journal Bearings: A Finite Element Algorithm for Groove Mixing Conditions

Fabrizio A. Stefani

The Effect of Diesel Engine Oil Contamination on Friction and Wear

Vegetable Oils as Base Oil for Industrial Lubricants: Evaluation Oxidative and Low Temperature Properties Using TGA, DTA and DSC

N. H. Jayadas, K. Prabhakaran Nair, and G. Ajithkumar

A Cavitation Algorithm for Arbitrary Lubricant Compressibility

Fredrik Sahlin, Andreas Almqvist, Sergei Glavatskih, and Roland Larsson

A Parametric Analysis of the Thermal Shear Localization in EHL Films

L. Chang
WTC2005-63968
On the Friction and Wear Performance of Boric Acid Lubricant Combinations in Extended Duration Operations
P. V. Deshmukh, M. Lovell, and W. G. Sawyer

WTC2005-63983
Meeting the Lubrication Challenges of Heavy Duty Low Emission Diesel Engines

WTC2005-64020
Experimental and Numerical Study of Emulsion Lubricated Strip Rolling
P. B. Kosasih and A. K. Tieu

WTC2005-64046
The Influence of Surface Roughness on Elastohydrodynamic Journal Bearing With Non-Newtonian Lubricants
Mongkol Mongkolwongrojn, Chatchai Atumpornsin, and Somnuk Yawong

WTC2005-64072
Gear Oils Based on Polyglycols: New Solution for the Lubrication of Large Industrial Gear Drives
Hermann Siebert and Ulrich Mann

WTC2005-64073
Adsorption Modeling of Fatty and Oleic Estolide Esters via Boundary Lubrication Coefficient of Friction Measurements
T. L. Kurth, S. C. Cermak, J. A. Byars, and G. Biresaw

WTC2005-64078
Development of Low Phosphorous Engine Oils
K. Patel, P. B. Aswath, and R. L. Elsenbaumer

WTC2005-64079
Development and Evaluation of a High Performance Universal Grease
P. B. Aswath, S. Munot, K. Patel, and R. L. Elsenbaumer

WTC2005-64089
Film-Forming Properties of Estolides
Girma Biresaw, Terry A. Isbell, and Steven C. Cermak

WTC2005-64104
Investigation of O-Ring Deterioration Due to Polymerized Oil Oxidation Products
Akira Sasaki, Shinji Uchiyama, and Mario Kawasaki

WTC2005-64114
Effects of Bubble on the Viscosity Properties of Lubricant
W. S. Ng, M. C. Levesley, and M. Priest

WTC2005-64133
Study on the Effect of Hydrogenated Lubricant Base Oil Composition to Its Oxidation Stability
Xiao Li Hu and Hui Dong Wang

WTC2005-64135
A Micro-IRRAS Study of Lubricant Degradation Under Thin Film Conditions
P. M. Cann and H. A. Spikes

WTC2005-64143
An Easy Way to Find a Suitable Amount of Top-Up Oil
Akira Sasaki, Hideaki Tobisu, Shinji Uchiyama, and Mariko Kawasaki

WTC2005-64159
A Theory of Cavitation in an Oscillatory Oil Squeeze Film
D. C. Sun, Zhiming Zhang, Wen Wang, Meili Sun, and Xiaoyang Chen
Investigation of Cavitation Phenomenon in an Oscillatory Oil Squeeze Film

Wen Wang, Zhiming Zhang, Xiaoyang Chen, Meili Sun, and D. C. Sun

Shear Cavitation

P. A. Kottke, S. Bair, and W. O. Winer

Nano/Micro-Rheology of Perfluoropolyether Lubricants

Hyoung J. Choi, Qian Guo, Pil Seung Chung, and Myung S. Jhon

Experimental Investigation of Cavitation in an Oil Squeeze Film Subjected to Displacement-Controlled Oscillations

Meili Sun, Xiaoyang Chen, Wen Wang, Kai Meng, D. C. Sun, and Zhiming Zhang

Journal Bearings Stability With Consideration of Fluid Inertia

Juliana G. Javorova, Vassil A. Alexandrov, Kiril Stanulov, and Tzveti Tzvetkof

An Analysis of Hydraulic Fluid Wear Performance Discrimination Based on a Statistical Evaluation of a Standard Vane Pump Test

Richard T. Dixon, Jamie Clare, Maggie Wenham, and Ronald Bakker

KRL Thrust Bearing Rig: Effects of Test Conditions on Bearing Performance

Carl F. Kernizan, Carlos L. Cerda de Groote, and Melinda E. Bartlett

Soft EHL Lubrication of Complex Multiphase Fluids

J. de Vicente, H. A. Spikes, and J. R. Stokes

The Use of a Stress Rheometer in Lieu of Cone Penetration

Bryan Johnson

Random Surface Roughness Effects in Microasperity Lubrication

Prerit Vyas and Lyndon S. Stephens

Heat Transfer Properties of Engine Oils

Scott Wrenick, Paul Sutor, Harold Pangilinan, and Ernest E. Schwarz
