INTRODUCTION

KEYNOTE PAPERS

**WTC2005-63960**
Antiwear Chemistry in Presence of ZDDP

*J. M. Martin and C. Minfray*

**WTC2005-64290**
The Role of Temperature and Substrate Pairing in the Tribochemistry of Phosphorus-Based Additives

*N. D. Spencer, R. Heuberger, J. Antifakos, and A. Rossi*

**WTC2005-64399**
Tribochemistry of Materials

*Stephen M. Hsu*

**WTC2005-63120**
Neat Ionic Liquids and Additives in Lubrication of Steel-Aluminum

*A. E. Jimenez, M. D. Bermudez, P. Iglesias, F. J. Carrion, and G. Martinez-Nicolas*

**WTC2005-63173**
Tribological Applications of WS$_2$ (MoS$_2$) Inorganic Fullerene-Like Nanoparticles as Solid Lubrication

*L. Rapoport, N. Fleischer, and R. Tenne*

**WTC2005-63219**
Synthesis and Wear Performance of New Thiocarbamate Derivatives

**WTC2005-63220**
Carbon Nanotubes and Onions as Lubricant Additives

*L. Joly-Pottuz, J. M. Martin, F. Dassenoy, B. Vacher, T. Mieno, and N. Ohmae*

**WTC2005-63221**
Inorganic Fullerene-Like Nanoparticles as New Lubricant Additives: A Drug Delivery Mechanism

*L. Joly-Pottuz, J. M. Martin, F. Dassenoy, C. Schuffenhauer, R. Tenne, and N. Fleischer*

**WTC2005-63224**
Nano-Objects and Their Influence on Properties of Motor Oils

**WTC2005-63246**
Tribofilms Generated From ZDDP and DDP on Steel Surfaces: Part 1 — Growth, Wear and Morphology

*Z. Zhang, E. S. Yamaguchi, M. Kasrai, and G. M. Bancroft*

**WTC2005-63251**
Tribofilms Generated From ZDDP and DDP on Steel Surfaces: Part 2 — Chemistry

*Z. Zhang, E. S. Yamaguchi, M. Kasrai, G. M. Bancroft, X. Liu, and M. E. Fleet*

**WTC2005-63308**
A Critical Assessment of Tribopolymerization as an Antiwear Mechanism

*Michael J. Furey, Czeslaw Kajdas, Gustavo J. Molina, and Brian Vick*

**WTC2005-63348**
Opportunities for Replacement of Phosphorus and Dithiophosphates in Lubricating Oil With Borate Ester Additive Containing Nitrogen

*Jianqiang Hu, Junbing Yao, and Zhanhe Du*
WTC2005-63361
Understanding the Tribological Chemistry of Chlorine- and Sulfur- and Phosphorus-Containing Additives
Wilfred T. Tysoe

WTC2005-63380
Process Development and Tribochemical Evaluation of Seed Oil Based Antiwear/Antifriction Additive
Atanu Adhvaryu, Brajendra K. Sharma, and Sevim Z. Erhan

WTC2005-63396
Effect of Mechanochemical Activation on Surface Oxidation of Steel Ball in Milling Serpentine
He Yang, Shenghua Li, and Yuansheng Jin

WTC2005-63439
The Resistance to Scuffing, Seizure and Pitting as a Result of the Chemistry of Lubricating Oils
Waldemar Tuszyński, Remigiusz Michalczewski, Edyta Osuch-Słomka, and Marian Szczeręk

WTC2005-63452
Orientation and Degradation of Polymer Sliding Surfaces Evaluated by Raman Spectroscopy
Pieter Samyn, Jan Quintelier, Patrick De Baets, Jeroen Van Craenenbroeck, Francis Verpoort, and Gustaaf Schoukens

WTC2005-63459
The Role of Electron Emission in Tribochemistry: A Review
Michael J. Furey, Czesław Kajdas, Gustavo J. Molina, and Brian Vick

WTC2005-63509
Tribomechanical-Chemical Effects and Visualisation of Additive's Layer Formation in Engine Crankcase Oil Between Sliding Pairs
Hakan Kaleli and Yves Berthier

WTC2005-63592
Oxidation Chemistry of Primary and Secondary Antioxidants
T. E. Karis and M. D. Carter

WTC2005-63650
Comparison of Aluminum Cold Strip Rolling Lubricant Additives
Arnaud Riss, Robert Combarieu, Pierre Montmitonnet, and Patrick Deneuville

WTC2005-63880
Study of Surface Films of Overbased Sulphonates and Sulfurized Olefins by X-Ray Absorption Near Edge Structure (XANES) Spectroscopy
M. T. Costello

WTC2005-63950
Experimental Study on Influences of Electric Double Layer on Thin Film Lubrication
X. J. Wang, S. X. Bai, and P. Huang

WTC2005-63954
Molecular Mechanisms of Anti-Wear Pad Formation and Functionality
Nicholas J. Mosey, Martin H. Müser, and Tom K. Woo

WTC2005-64002
Study on Biodegradable Lubricants: Improvement in Oxidative Stability of Vegetable Oils
Jiusheng Li

WTC2005-64007
Quantum Chemical Studies of Free-Radical, Hindered Phenol Stabilizers
Jim Pfendtner, Linda J. Broadbelt, and Q. Jane Wang

WTC2005-64075
ZDDP-Additive-Catalyst Interactions in Engine Oil
K. Parekh, R. Mourhatch, and P. B. Aswath
A Very Effective Stabilizer for Perfluoropolyether Lubricants
  P. Maccone, G. Boccaletti, S. Petricci, and S. Radice

Friction-Induced Change of Boron Hybridization in Lubricant Additives
  D. Philippon, M. I. De Barros, Th. Le Mogne, J. M. Martin, and M. Kasrai

Synthesis of the Multifunctional Additive N-acyl Glutamic Acid and Application in Water-Based Lubricating Fluids
  Haizhen Jiang, Dehua Tao, and Bin Wang

Study of Relationship Between Structure of the Organic Aliphatic Acid and Rust-Inhibiting and Tribological Behavior in the Water-Based Cutting Fluid
  Haizhen Jiang, Dehua Tao, and Bin Wang

Study on Lubrication Properties of Carboxymethyl Cellulose as a Novel Additive in Water-Based Stock
  Wenchao Guan, Gang Ke, Changyu Tang, and Yifeng Liu

Tribology Testing of Advanced Aviation Oils, Bearing and Gear Materials
  L. D. Wedeven, W. F. Black, and D. J. Carlisle

Tribochemical Reactions at the Water-Lubricated Silicon Nitride Interface: Gel Formation Mechanism
  Richard S. Gates, Z. Charles Ying, and Stephen M. Hsu
