

Instructions

- (1) Cut around the outside of the pattern.
- (2) Place the fold pattern face-down on a piece of card, and then draw along each of the four heavy dashed lines with a ball-point pen to score these fold-lines.
- (3) Place the fold pattern face-up on the card, and then draw along each of the four light dotted lines to score these fold-lines.
- (4) Pre-fold each of the fold lines away from the line you have drawn — the folds will go alternately up and down.
- (5) Cajole the whole pattern into folding — it gets easier with practice!
